RE Potential Government Closure

---

This weeks IFAP contains information regarding the potential government closure.

In the event of a closure of the federal government (more commonly referred to as a shutdown or furlough), there will be minimal impact on schools, lenders, and guaranty agencies and their ability to administer the Title IV Programs.

I recommend you read the Electronic Announcement in its entirety for a detailed description of how the different departments of Title IV processing will be affected in the event of a closure.

Please copy and paste the link below to your browser.
